

Anesthesiologist Panels

PROTECT YOUR STAFF From Scattered C-Arm X-Rays

*Independent scientific
test data available
upon request.*

- Offers clinically significant reductions in scatter-radiation (up to 99%*) while allowing C-Arm mobility
- Designed for use in addition to lead aprons
- Most effective when deployed on the patient and from the patient to the floor
- Scatter-Ban's unique system of leaded patient panels and straps are fully adjustable to accommodate the desired view
- Easy to install detachable panels are compatible with most 20" -22" wide table tops

LET THE TABLE CARRY THE WEIGHT
